Despite convincing evidence that observed climate changes do not portend a calamitous future, global warming alarmism is invading nearly every aspect of our society. Children are flooded with apocalyptic visions and ideas in our schools. Poor countries shake down rich ones in the name of climate justice. Lawmakers try to impose tariffs and sanctions on nations that don't agree with their environmental preconceptions. Even the military uses climate change as an excuse to enlarge its budget. Edited by leading climatologist Patrick Michaels, widely acknowledged by climate alarmists as today's most effective advocate of the non-apocalyptic view of climate change. Michaels has gathered a team of first-rate experts on health, education, religion, defense, development, law, trade, and academic publication to produce this comprehensive documentation of the pervasive influence of global warming alarmism on almost every aspect of society.
