**Practical Tools for Designing and Weighting Survey Samples: 51 (Statistics for Social and Behavioral Sciences)** Richard Valliant, Jill A. Dever, Frauke Kreuter

Survey sampling is fundamentally an applied field. The goal in this book is to put an array of tools at the fingertips of practitioners by explaining approaches long used by survey statisticians, illustrating how existing software can be used to solve survey problems, and developing some specialized software where needed. This book serves at least three audiences: (1) Students seeking a more in-depth understanding of applied sampling either through a second semester-long course or by way of a supplementary reference; (2) Survey statisticians searching for practical guidance on how to apply concepts learned in theoretical or applied sampling courses; and (3) Social scientists and other survey practitioners who desire insight into the statistical thinking and steps taken to design, select, and weight random survey samples.

Several survey data sets are used to illustrate how to design samples, to make estimates from complex surveys for use in optimizing the sample allocation, and to calculate weights. Realistic survey projects are used to demonstrate the challenges and provide a context for the solutions. The book covers several topics that either are not included or are dealt with in a limited way in other texts. These areas include: sample size computations for multistage designs; power calculations related to surveys; mathematical programming for sample allocation in a multi-criteria optimization setting; nuts and bolts of area probability sampling; multiphase designs; quality control of survey operations; and statistical software for survey sampling and estimation. An associated R package, PracTools, contains a number of specialized functions for sample size and other calculations. The data sets used in the book are also available in PracTools, so that the reader may replicate the examples or perform further analyses.

### **From reader reviews:**

#### **Jimmy Hicks:**

As people who live in the actual modest era should be update about what going on or info even knowledge to make these people keep up with the era that is always change and make progress. Some of you maybe can update themselves by looking at books. It is a good choice for you but the problems coming to anyone is you don't know which you should start with. This Practical Tools for Designing and Weighting Survey Samples: 51 (Statistics for Social and Behavioral Sciences) is our recommendation so you keep up with the world. Why, because book serves what you want and wish in this era.

#### **Ruben Jenkins:**

The book with title Practical Tools for Designing and Weighting Survey Samples: 51 (Statistics for Social and Behavioral Sciences) contains a lot of information that you can learn it. You can get a lot of advantage after read this book. This specific book exist new know-how the information that exist in this book represented the condition of the world at this point. That is important to you to be aware of how the improvement of the world. That book will bring you with new era of the the positive effect. You can read the e-book with your smart phone, so you can read the idea anywhere you want.

#### **Casey Schnell:**

People live in this new morning of lifestyle always try to and must have the extra time or they will get lot of stress from both everyday life and work. So , when we ask do people have time, we will say absolutely of course. People is human not really a huge robot. Then we consult again, what kind of activity do you possess when the spare time coming to a person of course your answer will unlimited right. Then do you try this one, reading guides. It can be your alternative throughout spending your spare time, often the book you have read is usually Practical Tools for Designing and Weighting Survey Samples: 51 (Statistics for Social and Behavioral Sciences).

#### **Harold Karr:**

In this period globalization it is important to someone to acquire information. The information will make anyone to understand the condition of the world. The condition of the world makes the information easier to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher which print many kinds of book. The book that recommended to your account is Practical Tools for Designing and Weighting Survey Samples: 51 (Statistics for Social and Behavioral Sciences) this publication consist a lot of the information on the condition of this world now. That book was represented just how can the world has grown up. The dialect styles that writer make usage of to explain it is easy to understand. The writer made some investigation when he makes this book. Here is why this book suitable all of you.
