### Advances and Technical Standards in Neurosurgery: 28

As an addition to the European postgraduate training system for young neurosurgeons, we began to publish in 1974 this series of Advances and Technical Standards in Neurosurgery which was later sponsored by the European Association of Neurosurgical Societies. This series was first discussed in 1972 at a combined meeting of the Italian and German Neurosurgical Societies in Taormina, the founding fathers of the series being Jean Brihaye, Bernard Pertuiset, Fritz Loew and Hugo Krayenbuhl. Thus were established the principles of European co operation which have been born from the European spirit, flourished in the European Association, and have been associated throughout with this series. The fact that the English language is now the international medium for communication at European scientific conferences is a great asset in terms of mutual understanding. Therefore we have decided to publish all contributions in English, regardless of the native language of the authors. All contributions are submitted to the entire editorial board before publication of any volume for scrutiny and suggestions for revision. Our series is not intended to compete with the publications of original scientific papers in other neurosurgical journals. Our intention is, rather, to present fields of neurosurgery and related areas in which important recent advances have been made. The contributions are written by specialists in the given fields and constitute the first part of each volume.

### From reader reviews:

#### Henry Major:

Typically the book Advances and Technical Standards in Neurosurgery: 28 has a lot info on it. So when you read this book you can get a lot of gain. The book was compiled by the very famous author. This articles author makes some research prior to write this book. That book very easy to read you may get the point easily after scanning this book.

#### Edward Donnelly:

Precisely why? Because this Advances and Technical Standards in Neurosurgery: 28 is an unordinary book that the inside of the reserve waiting for you to snap that but latter it will distress you with the secret the idea inside. Reading this book close to it was fantastic author who also write the book in such awesome way makes the content within easier to understand, entertaining way but still convey the meaning fully. So , it is good for you because of not hesitating having this any more or you going to regret it. This unique book will give you a lot of advantages than the other book possess such as help improving your proficiency and your critical thinking method. So , still want to delay having that book? If I were you I will go to the publication store hurriedly.

#### Heather Garcia:

In this period globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of personal references to get information example: internet, magazine, book, and soon. You can see that now, a lot of publisher that print many kinds of book. Typically the book that recommended for your requirements is Advances and Technical Standards in Neurosurgery: 28 this publication consist a lot of the information from the condition of this world now. This book was represented how do the world has grown up. The vocabulary styles that writer make usage of to explain it is easy to understand. Often the writer made some research when he makes this book. That's why this book acceptable all of you.

#### Jason Caldwell:

As a university student exactly feel bored for you to reading. If their teacher questioned them to go to the library or even make summary for some book, they are complained. Just minor students that has reading's spirit or real their pastime. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that reading is not important, boring and can't see colorful images on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this Advances and Technical Standards in Neurosurgery: 28 can make you experience more interested to read.
