System on Chip Interfaces for Low Power Design Sanjeeb Mishra, Neeraj Kumar Singh, Vijayakrishnan Rousseau

System on Chip Interfaces for Low Power Design provides a top-down understanding of interfaces available to SoC developers, not only the underlying protocols and architecture of each, but also how they interact and the tradeoffs involved. The book offers a common context to help understand the variety of available interfaces and make sense of technology from different vendors aligned with multiple standards. With particular emphasis on power as a factor, the authors explain how each interface performs in various usage scenarios and discuss their advantages and disadvantages. Readers learn to make educated decisions on what interfaces to use when designing systems and gain insight for innovating new/custom interfaces for a subsystem and their potential impact.

- Provides a top-down guide to SoC interfaces for memory, multimedia, sensors, display, and communication
- Explores the underlying protocols and architecture of each interface with multiple examples
- Guides through competing standards and explains how different interfaces might interact or interfere with each other
- Explains challenges in system design, validation, debugging and their impact on development

From reader reviews:

Luis Acosta:

Do you have favorite book? Should you have, what is your favorite's book? Guide is very important thing for us to learn everything in the world. Each e-book has different aim or perhaps goal; it means that publication has different type. Some people experience enjoy to spend their the perfect time to read a book. These are reading whatever they have because their hobby will be reading a book. How about the person who don't like examining a book? Sometime, person feel need book once they found difficult problem or perhaps exercise. Well, probably you should have this System on Chip Interfaces for Low Power Design.

Thomas Heiden:

The book System on Chip Interfaces for Low Power Design can give more knowledge and information about everything you want. Why then must we leave the best thing like a book System on Chip Interfaces for Low Power Design? Some of you have a different opinion about e-book. But one aim which book can give many info for us. It is absolutely proper. Right now, try to closer with the book. Knowledge or info that you take for that, you can give for each other; it is possible to share all of these. Book System on Chip Interfaces for Low Power Design has simple shape nevertheless, you know: it has great and massive function for you. You can appearance the enormous world by wide open and read a e-book. So it is very wonderful.

Charles Stubblefield:

What do you concerning book? It is not important to you? Or just adding material if you want something to explain what the one you have problem? How about your time? Or are you busy particular person? If you don't have spare time to complete others business, it is make one feel bored faster. And you have spare time? What did you do? All people has many questions above. They have to answer that question mainly because just their can do which. It said that about reserve. Book is familiar on every person. Yes, it is correct. Because start from on jardín de infancia until university need this kind of System on Chip Interfaces for Low Power Design to read.

Georgia Cunningham:

Reading a book tends to be new life style on this era globalization. With examining you can get a lot of information that can give you benefit in your life. With book everyone in this world may share their idea. Books can also inspire a lot of people. A lot of author can inspire their particular reader with their story or perhaps their experience. Not only the storyplot that share in the ebooks. But also they write about the knowledge about something that you need example. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors these days always try to improve their ability in writing, they also doing some study before they write for their book. One of them is this System on Chip Interfaces for Low Power Design.
