This book introduces PowerPoint planning basics and design to help teachers create better learning environments for their students. It describes the benefits of multimedia, the design process, the benefits of having their students design multimedia and metaphors, and organizations for multimedia projects. This book can be used as a stand-alone book in a multimedia design class for educators, or it can be used as a companion for books that focus on multimedia design and use multimedia projects in classrooms but do not deal with a specific technology for implementing the projects. It also stands by itself as a how-to guide.
