- Upgrade the data in a Magento 1 shop to a Magento 2 shop
- Manage the look and feel of the shop with custom themes
- Extend the shop with custom functionality such as forms, grids, and more
- Accelerate your store with some performance tools
- Build and structure your own shipping module
- Test your shop with automated tests and manage your product display

## About the Author

**Bart Delvaux** is an experienced web developer with several years of experience in the PHP world. He has worked with the most important frameworks in PHP, such as Drupal and Zend Framework, but Magento is his specialization.

Bart has obtained all the Magento developer certifications: Front End Developer, Developer, as well as Developer Plus. He currently works for ISAAC Software Solutions, a company that specializes in software solutions such as web shops, apps, system integrations, and more.

Bart finished a large variety of Magento projects in his Magento career that started in 2010 with the principle "quality above quantity". Having gone from handling a basic shop to shipping modules and large, complex Magento stores, Magento holds no secrets from him.

Bart has also worked on *Magento 1.8 Development Cookbook*, Packt Publishing. Now that Magento 2 is out, it is time for the next one!
