Predicting Pronunciation and Spelling in the English Language Aldilami Abbas

Predicting Pronunciation and Spelling in the English Language was written to help the millions of foreign English learners all over the world, including those living in countries with large immigrant populations, such as the United States, Canada, England, and Australia. Native English speakers who misspell or mispronounce words in their spoken language can also benefit.

This book goes beyond the well-trodden path of learning English by means of listening and imitating. It provides a way for learners to be able to predict how to utter and spell a word. It offers a clear understanding of the way the English language works.

The book answers many questions, such as:

How many sounds does the English language have for the letter "c"?

How can students recognize the "s" sound versus the "k" sound when the letter "c" is in the words?

What vowels come with the letter "c" to produce sound "sh"?

What situations make the letter "c" appear in writing and disappear in pronunciation and reading?

The Abbas Method provides learners with the rules and an understanding as to how they work, and assures easy, clear, and quick results.
