Biopharmaceuticals in Plants: Toward the Next Century of Medicine Kathleen Laura Hefferon

Transgenic plants present enormous potential to become one of the most cost-effective and safe systems for large-scale production of proteins for industrial, pharmaceutical, veterinary, and agricultural uses. Over the past decade, much progress has been made with respect to the development of vaccines, antibodies, and other therapeutic proteins. **Biopharmaceuticals in Plants: Toward the Next Century of Medicine** provides a comprehensive survey of all major aspects of the development and production of plant-made biopharmaceuticals.

Accompanied by an exhaustive list of references to facilitate further study, this critical volume:

- Describes the theory and practice of modern plant transformation techniques with respect to nuclear and plastid genomes
- Outlines the steps involved in the generation of transgenic plants
- Discusses the engineering of plant virus expression vectors for transient expression of vaccine proteins and other therapeutics in plant tissue
- Addresses the significant role of glycosylation in the production of plant-made mammalian proteins
- Investigates the basis of mucosal immunity using plant-based oral vaccines
- Examines the scale-up of plant-derived vaccine and therapeutic proteins in entire crops or in large batch cell suspension cultures
- Explores the development of clinical trials utilizing plant-derived biopharmaceutical proteins
- Evaluates risks and biosafety concerns regarding plant-derived pharmaceuticals

The book concludes with a discussion of the future of plant-based vaccines and other therapeutic proteins with respect to commercial viability and as a tool to improve global public health. Far-reaching in its scope, this text is a baseline reference that students and researchers in a broad range of fields such as medicine, plant science, biotechnology, crop science, natural products chemistry, and engineering will consult regularly. It will also serve as a useful tool for individuals and companies seeking to invest in this dynamic area.

From reader reviews:

Kayla Wilson:

Reading a guide can be one of a lot of pastime that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a reserve will give you a lot of new data. When you read a guide you will get new information mainly because book is one of numerous ways to share the information or perhaps their idea. Second, reading a book will make you more imaginative. When you reading through a book especially hype book the author will bring that you imagine the story how the characters do it anything. Third, you could share your knowledge to other people. When you read this Biopharmaceuticals in Plants: Toward the Next Century of Medicine, you could tells your family, friends and soon about yours guide. Your knowledge can inspire different ones, make them reading a e-book.

Dorothea Proffitt:

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their sparetime with their family, or their very own friends. Usually they performing activity like watching television, going to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your personal free time/ holiday? May be reading a book is usually option to fill your no cost time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to consider look for book, may be the guide untitled Biopharmaceuticals in Plants: Toward the Next Century of Medicine can be good book to read. May be it is usually best activity to you.

Jimmy Dolce:

The actual book Biopharmaceuticals in Plants: Toward the Next Century of Medicine has a lot associated with on it. So when you read this book you can get a lot of benefit. The book was published by the very famous author. The writer makes some research just before write this book. This book very easy to read you can get the point easily after reading this article book.

Miguel Sherman:

Would you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Try and pick one book that you just dont know the inside because don't evaluate book by its cover may doesn't work at this point is difficult job because you are scared that the inside maybe not as fantastic as in the outside appearance likes. Maybe you answer can be Biopharmaceuticals in Plants: Toward the Next Century of Medicine why because the wonderful cover that make you consider with regards to the content will not disappoint a person. The inside or content is actually fantastic as the outside or even cover. Your reading 6th sense will directly assist you to pick up this book.
