Global Displacements: The Making of Uneven Development in the Caribbean (Antipode Book Series)

Marion Werner

Challenging the main ways we debate globalization, *Global Displacements* reveals how uneven geographies of capitalist development shape—and are shaped by—the aspirations and everyday struggles of people in the global South.

- Makes an original contribution to the study of globalization by bringing together critical development and feminist theoretical approaches
- Opens up new avenues for the analysis of global production as a long-term development strategy
- Contributes novel theoretical insights drawn from the everyday experiences of disinvestment and precarious work on people's lives and their communities
- Represents the first analysis of increasing uneven development among countries in the Caribbean
- Calls for more rigorous studies of long accepted notions of the geographies of inequality and poverty in the global South
