Cancer Vaccines: From Research to Clinical Practice

Cancer Vaccines: From Research to Clinical Practice

Recent advances in immunology and biology have opened new horizons in cancer therapy, included in the expanding array of cancer treatment options, which are immunotherapies, or cancer vaccines, for both solid and blood borne cancers. **Cancer Vaccines: From Research to Clinical Practice** is the first text in the field to bring immunotherapy treatments from the laboratory trial to the bedside for the practicing oncologist.

Cancer Vaccines: From Research to Clinical Practice:

- Analyzes the most promising classes of investigational immunotherapies, integrating their scientific rationale and clinical potential
- Discusses "theranostics" as pertaining to immunotherapy, i.e., using molecular diagnostics to identify patients that would most likely benefit from a therapy
- Presents the new paradigm of biomarker guided R&D and clinical development in immunotherapy of cancer
- Reviews bottlenecks in translational process of immunotherapies and offers strategies to resolve them
