**Mind Builders: Multidisciplinary Challenges for Cooperative Team-building and Competition** Paul Fleisher, Donald M. Ziegler

Like the nationally known Destination Imagination competition, *Mind Builders* offers simple engineering problems to be solved by student teams. It begins with a few exercises to introduce the team concept. These are followed by ten warm up problems that can be completed within an hour or less, with little advanced preparation. Finally, teachers choose one of 12 engineering challenges to be completed by teams over an extended period, and presented to judges on Challenge Day.

For more than twenty years, the Richmond, Virginia Public Schools' program for gifted students has conducted an interscholastic competition similar to the nationally known competition, Destination Imagination. In the featured contest of this yearly event, teams of five students present solutions to engineering problems that they have worked on for several weeks or more. The problems are multidisciplinary, including elements of research, writing, mathematics and science, and a creative dramatic or musical presentation. Each challenge requires just a few inexpensive materials and a minimum of equipment.

In addition to their use with gifted students and others in interscholastic competitions, these problems make excellent challenges for classroom use, or even for use with extracurricular or recreational organizations such as Scout groups or Boys and Girls Clubs. They are written to include basic skills from the core curriculum, and require students to work cooperatively to solve problems with multiple solutions. This book offers 12 simple engineering problems plus ten warm up problems to be solved by student teams. Each challenge includes detailed specifications, hints for teachers and coaches, scoring rubrics, a list of references that will help students get started on the problem, and a check-list for administering each competition.

### **From reader reviews:**

#### **Peter Barba:**

Information is provisions for anyone to get better life, information today can get by anyone in everywhere. The information can be a expertise or any news even a concern. What people must be consider if those information which is within the former life are challenging be find than now could be taking seriously which one works to believe or which one the actual resource are convinced. If you obtain the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All of those possibilities will not happen with you if you take Mind Builders: Multidisciplinary Challenges for Cooperative Team-building and Competition as your daily resource information.

#### **Tamiko Harmon:**

Do you like reading a reserve? Confuse to looking for your selected book? Or your book has been rare? Why so many problem for the book? But almost any people feel that they enjoy regarding reading. Some people likes looking at, not only science book but in addition novel and Mind Builders: Multidisciplinary Challenges for Cooperative Team-building and Competition or others sources were given know-how for you. After you know how the truly great a book, you feel desire to read more and more. Science book was created for teacher or maybe students especially. Those textbooks are helping them to include their knowledge. In other case, beside science book, any other book likes Mind Builders: Multidisciplinary Challenges for Cooperative Team-building and Competition to make your spare time much more colorful. Many types of book like this.

#### **Dennis Gaines:**

A lot of publication has printed but it differs. You can get it by world wide web on social media. You can choose the most effective book for you, science, comedian, novel, or whatever simply by searching from it. It is called of book Mind Builders: Multidisciplinary Challenges for Cooperative Team-building and Competition. You can include your knowledge by it. Without causing the printed book, it may add your knowledge and make anyone happier to read. It is most crucial that, you must aware about book. It can bring you from one destination for a other place.

#### **Jackie Thompson:**

Reserve is one of source of know-how. We can add our know-how from it. Not only for students but in addition native or citizen will need book to know the upgrade information of year in order to year. As we know those books have many advantages. Beside we all add our knowledge, can also bring us to around the world. Through the book Mind Builders: Multidisciplinary Challenges for Cooperative Team-building and Competition we can have more advantage. Don't that you be creative people? Being creative person must like to read a book. Just choose the best book that appropriate with your aim. Don't always be doubt to change your life with that book Mind Builders: Multidisciplinary Challenges for Cooperative Team-building

and Competition. You can more desirable than now.
