Free Energy Calculations: 86 (Springer Series in Chemical Physics)

Christophe Chipot, Andrew Pohorille

Free Energy Calculations: 86 (Springer Series in Chemical Physics) Christophe Chipot, Andrew Pohorille

Free energy constitutes the most important thermodynamic quantity to understand how chemical species recognize each other, associate or react. Examples of problems in which knowledge of the underlying free energy behaviour is required, include conformational equilibria and molecular association, partitioning between immiscible liquids, receptor-drug interaction, protein-protein and protein-DNA association, and protein stability. This volume sets out to present a coherent and comprehensive account of the concepts that underlie different approaches devised for the determination of free energies. The reader will gain the necessary insight into the theoretical and computational foundations of the subject and will be presented with relevant applications from molecular-level modelling and simulations of chemical and biological systems. Both formally accurate and approximate methods are covered using both classical and quantum mechanical descriptions. A central theme of the book is that the wide variety of free energy calculation techniques available today can be understood as different implementations of a few basic principles. The book is aimed at a broad readership of graduate students and researchers having a background in chemistry, physics, engineering and physical biology.

From reader reviews:

Vincent Overly:

The e-book untitled Free Energy Calculations: 86 (Springer Series in Chemical Physics) is the publication that recommended to you to learn. You can see the quality of the book content that will be shown to you actually. The language that publisher use to explained their ideas are easily to understand. The writer was did a lot of exploration when write the book, so the information that they share for you is absolutely accurate. You also could get the e-book of Free Energy Calculations: 86 (Springer Series in Chemical Physics) from the publisher to make you considerably more enjoy free time.

John Dudley:

The actual book Free Energy Calculations: 86 (Springer Series in Chemical Physics) has a lot details on it. So when you check out this book you can get a lot of help. The book was compiled by the very famous author. The author makes some research ahead of write this book. That book very easy to read you can obtain the point easily after scanning this book.

Raymond Childers:

Beside this particular Free Energy Calculations: 86 (Springer Series in Chemical Physics) in your phone, it can give you a way to get closer to the new knowledge or information. The information and the knowledge you are going to got here is fresh from oven so don't always be worry if you feel like an older people live in narrow commune. It is good thing to have Free Energy Calculations: 86 (Springer Series in Chemical Physics) because this book offers for your requirements readable information. Do you at times have book but you rarely get what it's exactly about. Oh come on, that would not happen if you have this within your hand. The Enjoyable blend here cannot be questionable, just like treasuring beautiful island. Use you still want to miss the idea? Find this book in addition to read it from at this point!

Michele Anderson:

You can get this Free Energy Calculations: 86 (Springer Series in Chemical Physics) by go to the bookstore or Mall. Just simply viewing or reviewing it might to be your solve challenge if you get difficulties for the knowledge. Kinds of this e-book are various. Not only through written or printed but in addition can you enjoy this book by means of e-book. In the modern era like now, you just looking by your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose suitable ways for you.
