Freedom and Tenure in the Academy

Freedom and Tenure in the Academy

Questions of academic freedom--from hate speech to the tenure structure—continue to be of great urgency and perennial debate in American higher education. Originally published as a special issue of *Law and Contemporary Problems* (Summer 1990), this volume draws together leading scholars of law, philosophy, and higher education to offer a fresh assessment of the founding principles of academic freedom and to define this crucial topic for the 1990s.

The original 1940 *Statement of Principles on Academic Freedom and Tenure*, which has been influential in determining institutional practices for the last half century, has required continual redefinition since its initial declaration. The volume begins with two overview articles: the most complete examination of the 1940 Statement ever provided (shedding light on some of its most troublesome clauses) and a historical review of the extent to which academic freedom has been accepted into domestic constitutional law. Subsequent articles address a range of issues related to academic freedom: the relationship between tenure and academic freedom; tenure and labor law; ideology and faculty selection; freedom of expression and the arts on campus; the boundaries defining hate speech and offensive expression; the clash between institutional and individual claims of academic freedom; and the practices of religious colleges in the United States.
