Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) Bud Fox Ph.D., Bud

Software Application Development: A Visual C++, MFC, and STL Tutorial provides a detailed account of the software development process using Visual C++, MFC, and STL. It covers everything from the design to the implementation of all software modules, resulting in a demonstration application prototype which may be used to efficiently represent mathematical equations, perform interactive and intuitive model-building, and conduct control engineering experiments.

All computer code is included, allowing developers to extend and reuse the software modules for their own project work. The book's tutorial-like approach empowers students and practitioners with the knowledge and skills required to perform disciplined, quality, real-world software engineering.

From reader reviews:

Robert Burdette:

This book untitled Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) to be one of several books in which best seller in this year, that's because when you read this e-book you can get a lot of benefit on it. You will easily to buy that book in the book store or you can order it through online. The publisher on this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Touch screen phone. So there is no reason to your account to past this reserve from your list.

Debbie Allen:

Reading a book can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book consequently. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new facts. When you read a e-book you will get new information mainly because book is one of various ways to share the information as well as their idea. Second, looking at a book will make anyone more imaginative. When you reading through a book especially fiction book the author will bring someone to imagine the story how the figures do it anything. Third, you may share your knowledge to other folks. When you read this Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series), you may tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a guide.

Adelina Foreman:

As a college student exactly feel bored to reading. If their teacher expected them to go to the library or make summary for some reserve, they are complained. Just minor students that has reading's soul or real their passion. They just do what the trainer want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that studying is not important, boring and can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) can make you sense more interested to read.

Sharon Edwards:

What is your hobby? Have you heard that will question when you got students? We believe that that problem was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. So you know that little person similar to reading or as reading become their hobby. You have to know that reading is very important and also book as to be the point. Book is important thing to increase you knowledge, except your teacher or lecturer. You see good news or update about something by book. Amount types of books that can you choose to use be your object. One of them is this Software Application Development: A Visual C++,

MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series).
