Zach Shelby, Carsten Bormann

6LoWPAN: The Wireless Embedded Internet (Wiley Series on Communications Networking & Distributed Systems) Zach Shelby, Carsten Bormann

"It is stunningly thorough and takes readers meticulously through the design, configuration and operation of IPv6-based, low-power, potentially mobile radio-based networking." Vint Cerf, Vice President and Chief Internet Evangelist, Google

This book provides a complete overview of IPv6 over Low Power Wireless Area Network (6LoWPAN) technology

In this book, the authors provide an overview of the 6LoWPAN family of standards, architecture, and related wireless and Internet technology. Starting with an overview of the IPv6 'Internet of Things', readers are offered an insight into how these technologies fit together into a complete architecture. The 6LoWPAN format and related standards are then covered in detail. In addition, the authors discuss the building and operation of 6LoWPAN networks, including bootstrapping, routing, security, Internet integration, mobility and application protocols. Furthermore, implementation aspects of 6LoWPAN are covered.

Key Features:

- Demonstrates how the 6LoWPAN standard makes the latest Internet protocols available to even the most minimal embedded devices over low-rate wireless networks
- Provides an overview of the 6LoWPAN standard, architecture and related wireless and Internet technology, and explains the 6LoWPAN protocol format in detail
- Details operational topics such as bootstrapping, routing, security, Internet integration, mobility and application protocols
- Written by expert authors with vast experience in the field (industrial and academic)

6LoWPAN: The Wireless Embedded Internet is an invaluable reference for professionals working in fields such as telecommunications, control, and embedded systems. Advanced students and teachers in electrical engineering, information technology and computer science will also find this book useful.

From reader reviews:

Vicky Bowman:

As people who live in often the modest era should be update about what going on or details even knowledge to make these individuals keep up with the era and that is always change and advance. Some of you maybe will update themselves by studying books. It is a good choice for yourself but the problems coming to you is you don't know what kind you should start with. This 6LoWPAN: The Wireless Embedded Internet (Wiley Series on Communications Networking & Distributed Systems) is our recommendation to help you keep up with the world. Why, because book serves what you want and need in this era.

Nicolas Jones:

The reserve untitled 6LoWPAN: The Wireless Embedded Internet (Wiley Series on Communications Networking & Distributed Systems) is the e-book that recommended to you to study. You can see the quality of the guide content that will be shown to you actually. The language that creator use to explained their ideas are easily to understand. The author was did a lot of study when write the book, so the information that they share for your requirements is absolutely accurate. You also might get the e-book of 6LoWPAN: The Wireless Embedded Internet (Wiley Series on Communications Networking & Distributed Systems) from the publisher to make you a lot more enjoy free time.

Sue Joseph:

A lot of people always spent their own free time to vacation or even go to the outside with them household or their friend. Are you aware? Many a lot of people spent that they free time just watching TV, or perhaps playing video games all day long. If you want to try to find a new activity that is look different you can read a new book. It is really fun for you. If you enjoy the book that you just read you can spent 24 hours a day to reading a guide. The book 6LoWPAN: The Wireless Embedded Internet (Wiley Series on Communications Networking & Distributed Systems) it is rather good to read. There are a lot of individuals who recommended this book. We were holding enjoying reading this book. If you did not have enough space to deliver this book you can buy the particular e-book. You can m0ore effortlessly to read this book through your smart phone. The price is not too costly but this book features high quality.

Tracy Brown:

Does one one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Attempt to pick one book that you just dont know the inside because don't evaluate book by its include may doesn't work is difficult job because you are frightened that the inside maybe not since fantastic as in the outside search likes. Maybe you answer may be 6LoWPAN: The Wireless Embedded Internet (Wiley Series on Communications Networking & Distributed Systems) why because the fantastic cover that make you consider concerning the content will not disappoint a person. The inside or content is usually fantastic as the outside or perhaps cover. Your reading 6th sense will directly guide you to pick up this book.
