Infectious disease (ID) is a constant concern for pharmacy clinicians, with far too few specialists to meet the demand. That means that while more and more pharmacists are seeking the added qualification in infectious disease along with other Board Certifications, many clinical pharmacists have to meet a higher standard as de facto ID specialists. Further, treatment of infectious disease involves a good deal of grey area, which means that even the experts need a way to verify their mastery

Now, *Infectious Disease Pharmacotherapy Self Assessment*, by Lea Eiland and Diane Ginsburg, bring you thorough and relevant cases where questions are delivered with varying degrees of difficulty, allowing you to truly gauge your level of understanding of complex ID pharmacotherapy problems. Three levels of difficulty offers users a way to assess their mastery of ID topics.
