Northerly locations were desperately sought out after more accessible land further south was taken up. Wood identifies the demographic characteristics of the surging population of land-seekers, showing how some aspects echoed those of earlier settlers. The northern settlers of the interwar years grappled with demanding conditions, which required new adaptations. They were supported in their efforts by politicians, bureaucrats, and religious leaders who had less than innocent reasons for endorsing what were questionable settlement experiments in unopened or abandoned areas. The book includes a series of gripping case studies to illustrate both the face of failure and what appear to have been the ingredients for success in marginal areas.
