**Moderating the Debate: Rationality and the Promise of American Education** Michael J. Feuer

*Moderating the Debate* examines the complex and often problematic relations between education research, policy, and practice, and proposes ways to improve those relationships in the interest of meaningful reform. Drawing on his Burton and Inglis Lectures at the Harvard Graduate School of Education, Michael Feuer considers how the lessons of cognitive science might inform a more rational—and reasonable—approach to education research and policymaking. In this stimulating and insightful book, Feuer offers practical solutions to the impasses and disconnections that have chronically thwarted workable, sustained education reform.
