Supercritical Fluids Technology in Lipase Catalyzed Processes

Sulaiman Al-Zuhair, Hanifa Taher

Supercritical Fluids Technology in Lipase Catalyzed Processes Sulaiman Al-Zuhair, Hanifa Taher

Enzymes are currently used in various industries, most commonly in food, detergents, and pharmaceuticals production. Lipases are hydrolytic enzymes that demonstrate great potential as an alternative to conventional catalysts in a number of industrial applications. A complete understanding of enzymes, and their proteins structure and environmental behavior, can greatly aid in the further development of industrial applications.

Supercritical Fluids Technology in Lipase Catalyzed Processes provides basic information about enzymes, their sources, reaction kinetics, and main industrial applications. The book focuses in lipases. their main sources, structure, and features, with an emphasis on their specificity and interfacial activity, and presents proven techniques for isolating, extracting, and purifying.

Comprised of six compact chapters, this comprehensive guide introduces:

- Immobilization techniques and immobilized lipases that allow repeated use (which is essential from an economic point of view)
- Different bioreactor configurations using immobilized lipases
- The latest information on the available technologies in lipolytic reactions
- The advantages of nonaqueous media in biochemical synthesis over aqueous and solvent-free systems
- Material on the use of lipases in nonaqueous media to overcome the drawbacks usually encountered with the use of conventional chemical catalysts
- The use of supercritical fluids (SCFs) as a green alternative reaction medium
- Factors affecting the physical properties of lipases in this medium and, hence, their activity and stability
- A case study using supercritical carbon dioxide (SC-CO₂) for biodiesel production
- Novel, cutting-edge technology, using immobilized enzymes to reduce the overall production cost

Supercritical Fluids Technology in Lipase Catalyzed Processes outlines the main industrial applications of common enzymes and discusses relevant challenges and innovations emerging in the field.

From reader reviews:

David Earnest:

Book is to be different for each grade. Book for children till adult are different content. As it is known to us that book is very important usually. The book Supercritical Fluids Technology in Lipase Catalyzed Processes had been making you to know about other information and of course you can take more information. It doesn't matter what advantages for you. The book Supercritical Fluids Technology in Lipase Catalyzed Processes is not only giving you more new information but also for being your friend when you truly feel bored. You can spend your spend time to read your guide. Try to make relationship with all the book Supercritical Fluids Technology in Lipase Catalyzed Processes. You never truly feel lose out for everything when you read some books.

Ana Vela:

This Supercritical Fluids Technology in Lipase Catalyzed Processes book is not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is definitely information inside this reserve incredible fresh, you will get details which is getting deeper a person read a lot of information you will get. This particular Supercritical Fluids Technology in Lipase Catalyzed Processes without we understand teach the one who looking at it become critical in pondering and analyzing. Don't be worry Supercritical Fluids Technology in Lipase Catalyzed Processes can bring any time you are and not make your carrier space or bookshelves' turn into full because you can have it with your lovely laptop even cell phone. This Supercritical Fluids Technology in Lipase Catalyzed Processes having good arrangement in word along with layout, so you will not feel uninterested in reading.

Darlene Goins:

The book untitled Supercritical Fluids Technology in Lipase Catalyzed Processes is the guide that recommended to you to study. You can see the quality of the reserve content that will be shown to you. The language that article author use to explained their way of doing something is easily to understand. The article writer was did a lot of exploration when write the book, and so the information that they share to you is absolutely accurate. You also could possibly get the e-book of Supercritical Fluids Technology in Lipase Catalyzed Processes from the publisher to make you more enjoy free time.

Kenneth Matson:

The reserve with title Supercritical Fluids Technology in Lipase Catalyzed Processes has a lot of information that you can discover it. You can get a lot of profit after read this book. That book exist new expertise the information that exist in this reserve represented the condition of the world today. That is important to yo7u to learn how the improvement of the world. This particular book will bring you inside new era of the glowbal growth. You can read the e-book on the smart phone, so you can read this anywhere you want.
