Algorithmic and Artificial Intelligence Methods for Protein Bioinformatics (Wiley Series in Bioinformatics) Yi Pan, Jianxin Wang, Min Li

An in-depth look at the latest research, methods, and applications in the field of protein bioinformatics

This book presents the latest developments in protein bioinformatics, introducing for the first time cutting-edge research results alongside novel algorithmic and AI methods for the analysis of protein data. In one complete, self-contained volume, *Algorithmic and Artificial Intelligence Methods for Protein Bioinformatics* addresses key challenges facing both computer scientists and biologists, arming readers with tools and techniques for analyzing and interpreting protein data and solving a variety of biological problems.

Featuring a collection of authoritative articles by leaders in the field, this work focuses on the analysis of protein sequences, structures, and interaction networks using both traditional algorithms and AI methods. It also examines, in great detail, data preparation, simulation, experiments, evaluation methods, and applications. *Algorithmic and Artificial Intelligence Methods for Protein Bioinformatics*:

- Highlights protein analysis applications such as protein-related drug activity comparison
- Incorporates salient case studies illustrating how to apply the methods outlined in the book
- Tackles the complex relationship between proteins from a systems biology point of view
- Relates the topic to other emerging technologies such as data mining and visualization
- Includes many tables and illustrations demonstrating concepts and performance figures

Algorithmic and Artificial Intelligence Methods for Protein Bioinformatics is an essential reference for bioinformatics specialists in research and industry, and for anyone wishing to better understand the rich field of protein bioinformatics.

From reader reviews:

Joan Davis:

As people who live in often the modest era should be up-date about what going on or facts even knowledge to make these people keep up with the era that is always change and progress. Some of you maybe may update themselves by looking at books. It is a good choice in your case but the problems coming to an individual is you don't know which one you should start with. This Algorithmic and Artificial Intelligence Methods for Protein Bioinformatics (Wiley Series in Bioinformatics) is our recommendation to help you keep up with the world. Why, since this book serves what you want and wish in this era.

Ralph McClure:

The book untitled Algorithmic and Artificial Intelligence Methods for Protein Bioinformatics (Wiley Series in Bioinformatics) contain a lot of information on the item. The writer explains your ex idea with easy method. The language is very clear and understandable all the people, so do not necessarily worry, you can easy to read that. The book was published by famous author. The author gives you in the new time of literary works. It is easy to read this book because you can continue reading your smart phone, or gadget, so you can read the book in anywhere and anytime. If you want to buy the e-book, you can open up their official website in addition to order it. Have a nice read.

Timothy Kahle:

In this time globalization it is important to someone to find information. The information will make someone to understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of recommendations to get information example: internet, newspapers, book, and soon. You can observe that now, a lot of publisher this print many kinds of book. Typically the book that recommended for you is Algorithmic and Artificial Intelligence Methods for Protein Bioinformatics (Wiley Series in Bioinformatics) this guide consist a lot of the information of the condition of this world now. This kind of book was represented just how can the world has grown up. The words styles that writer use for explain it is easy to understand. The particular writer made some study when he makes this book. This is why this book appropriate all of you.

Tanya Caggiano:

What is your hobby? Have you heard in which question when you got college students? We believe that that problem was given by teacher on their students. Many kinds of hobby, Every person has different hobby. And you also know that little person similar to reading or as studying become their hobby. You must know that reading is very important as well as book as to be the factor. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You see good news or update concerning something by book. A substantial number of sorts of books that can you decide to try be your object. One of them is this Algorithmic and Artificial Intelligence Methods for Protein Bioinformatics (Wiley Series in

Bioinformatics).
