**Process Planning: The design/manufacture interface** Peter Scallan BSc MSc

**Process Planning** covers the selection of processes, equipment, tooling and the sequencing of operations required to transform a chosen raw material into a finished product. Initial chapters review materials and processes for manufacturing and are followed by chapters detailing the core activities involved in process planning, from drawing interpretation to preparing the final process plan. The concept of maximising or 'adding value' runs throughout the book and is supported with activities.

Designed as a teaching and learning resource, each chapter begins with learning objectives, explores the theory behind process planning, and sets it in a 'real-life' context through the use of case studies and examples. Furthermore, the questions in the book develop the problem-solving skills of the reader.

ISO standards are used throughout the book (these are cross-referenced to corresponding British standards).

This is a core textbook, aimed at undergraduate students of manufacturing engineering, mechanical engineering with manufacturing options and materials science.

- \* Features numerous case studies and examples from industry to help provide an easy guide to a complex subject
- \* Fills a gap in the market for which there are currently no suitable texts
- \* Learning aims and objectives are provided at the beginning of each chapter - a user-friendly method to consolidate learning

### **From reader reviews:**

#### **Shirley Gilliam:**

This Process Planning: The design/manufacture interface are usually reliable for you who want to be a successful person, why. The main reason of this Process Planning: The design/manufacture interface can be one of several great books you must have is usually giving you more than just simple studying food but feed you actually with information that perhaps will shock your earlier knowledge. This book is handy, you can bring it just about everywhere and whenever your conditions throughout the e-book and printed kinds. Beside that this Process Planning: The design/manufacture interface giving you an enormous of experience such as rich vocabulary, giving you trial run of critical thinking that could it useful in your day task. So , let's have it and enjoy reading.

#### **Kim McLoughlin:**

Hey guys, do you would like to finds a new book to learn? May be the book with the name Process Planning: The design/manufacture interface suitable to you? The particular book was written by famous writer in this era. The particular book untitled Process Planning: The design/manufacture interface is the main one of several books in which everyone read now. This book was inspired many men and women in the world. When you read this publication you will enter the new shape that you ever know just before. The author explained their concept in the simple way, so all of people can easily to comprehend the core of this reserve. This book will give you a wide range of information about this world now. So that you can see the represented of the world within this book.

#### **Timothy Hawkins:**

Playing with family in a very park, coming to see the ocean world or hanging out with close friends is thing that usually you could have done when you have spare time, and then why you don't try issue that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Process Planning: The design/manufacture interface, you may enjoy both. It is good combination right, you still want to miss it? What kind of hangout type is it? Oh come on its mind hangout fellas. What? Still don't understand it, oh come on its called reading friends.

#### **Joseph Nixon:**

You can get this Process Planning: The design/manufacture interface by visit the bookstore or Mall. Simply viewing or reviewing it may to be your solve trouble if you get difficulties for the knowledge. Kinds of this publication are various. Not only through written or printed and also can you enjoy this book by means of e-book. In the modern era similar to now, you just looking from your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose right ways

for you.
