See MIPS Run (The Morgan Kaufmann Series in Computer Architecture and Design) Dominic Sweetman

This second edition is not only a thorough update of the first edition, it is also a marriage of the best-known RISC architecture--MIPS--with the best-known open-source OS--Linux. The first part of the book begins with MIPS design principles and then describes the MIPS instruction set and programmers' resources. It uses the MIPS32 standard as a baseline (the 1st edition used the R3000) from which to compare all other versions of the architecture and assumes that MIPS64 is the main option. The second part is a significant change from the first edition. It provides concrete examples of operating system low level code, by using Linux as the example operating system. It describes how Linux is built on the foundations the MIPS hardware provides and summarizes the Linux application environment, describing the libraries, kernel device-drivers and CPU-specific code. It then digs deep into application code and library support, protection and memory management, interrupts in the Linux kernel and multiprocessor Linux.

Sweetman has revised his best-selling MIPS bible for MIPS programmers, embedded systems designers, developers and programmers, who need an in-depth understanding of the MIPS architecture and specific guidance for writing software for MIPS-based systems, which are increasingly Linux-based.

- * Completely new material offers the best explanation available on how Linux runs on real hardware.
- * Provides a complete, updated and easy-to-use guide to the MIPS instruction set using the MIPS32 standard as the baseline architecture with the MIPS64 as the main option.
- * Retains the same engaging writing style that made the first edition so readable, reflecting the authors 20+ years experience in designing systems based on the MIPS architecture.

From reader reviews:

Mary Bunch:

Reading can called thoughts hangout, why? Because when you find yourself reading a book specially book entitled See MIPS Run (The Morgan Kaufmann Series in Computer Architecture and Design) the mind will drift away trough every dimension, wandering in every single aspect that maybe unknown for but surely will end up your mind friends. Imaging every single word written in a guide then become one form conclusion and explanation in which maybe you never get before. The See MIPS Run (The Morgan Kaufmann Series in Computer Architecture and Design) giving you one more experience more than blown away your head but also giving you useful data for your better life within this era. So now let us present to you the relaxing pattern this is your body and mind is going to be pleased when you are finished examining it, like winning a. Do you want to try this extraordinary investing spare time activity?

Daryl Thurmond:

This See MIPS Run (The Morgan Kaufmann Series in Computer Architecture and Design) is completely new way for you who has interest to look for some information mainly because it relief your hunger info. Getting deeper you onto it getting knowledge more you know otherwise you who still having bit of digest in reading this See MIPS Run (The Morgan Kaufmann Series in Computer Architecture and Design) can be the light food in your case because the information inside this particular book is easy to get through anyone. These books develop itself in the form which is reachable by anyone, yeah I mean in the e-book form. People who think that in reserve form make them feel sleepy even dizzy this book is the answer. So there is not any in reading a e-book especially this one. You can find actually looking for. It should be here for anyone. So , don't miss the idea! Just read this e-book kind for your better life and also knowledge.

Dana Register:

Do you like reading a reserve? Confuse to looking for your selected book? Or your book ended up being rare? Why so many problem for the book? But any kind of people feel that they enjoy with regard to reading. Some people likes reading, not only science book but novel and See MIPS Run (The Morgan Kaufmann Series in Computer Architecture and Design) or perhaps others sources were given understanding for you. After you know how the truly amazing a book, you feel would like to read more and more. Science reserve was created for teacher as well as students especially. Those guides are helping them to put their knowledge. In additional case, beside science reserve, any other book likes See MIPS Run (The Morgan Kaufmann Series in Computer Architecture and Design) to make your spare time far more colorful. Many types of book like this.

Cynthia Necaie:

Reserve is one of source of know-how. We can add our understanding from it. Not only for students but in addition native or citizen need book to know the up-date information of year to be able to year. As we know

those textbooks have many advantages. Beside we add our knowledge, may also bring us to around the world. With the book See MIPS Run (The Morgan Kaufmann Series in Computer Architecture and Design) we can take more advantage. Don't one to be creative people? To get creative person must choose to read a book. Just simply choose the best book that acceptable with your aim. Don't possibly be doubt to change your life at this book See MIPS Run (The Morgan Kaufmann Series in Computer Architecture and Design). You can more pleasing than now.
